#### REMARKS

Claims 1, 5, 6, 11 and 15-19 (renumbered 1-9) are of record in this application and these have all been noted "allowed." No changes to the claims have been made or requested by this Amendment and thus, claims 1, 5, 6, 11 and 15-19 (renumbered 1-9) remain "allowed" in this case.

The corrections to the specification take two forms. First, all references in the background to the "Salt River Project" or "SRP" have been hereby deleted at the request of individuals associated with this agency. Neither this agency, nor anyone associated therewith has any interest, right or other legal connection to this invention. Any implication to the contrary has therefore been removed and is regretted.

Second, while making formal corrections to the drawings, a few reference numbering errors were noted both in the specification and in the drawings and both are hereby corrected. Approval of these changes and entry thereof in the record are respectfully requested. Thus, upon entry of this Amendment, the specification and formal drawings will accurately correspond with each other.

No new matter is introduced by these amendments. Hence, it is respectfully requested that the amendments to the drawings and specification be entered and that this case then be passed to issue.

Respectfully submitted,

Richard R. Mybeck
